Artist Megan Geckler's Bold Bobble Installation!

Categories: Art + Graphics

Los Angeles-based installation artist Megan Geckler is a favorite. She transforms environments in colorful ways using different materials to create often-times geometric, repeating patterns that have such a great soul to them. When contacted by one of our favorite water bottle manufacturers, Bobble, to do an art installation for [The International Home & Housewares Show](#) in Chicago, Illinois earlier this month, she said yes! And came up with a clever space that looks awesome. Using flagging tape and an aluminum structure she created a space 10x10x8' and reflecting the colorful and fun brand of Bobble perfectly. Now if she would only come make one of these installations in our house! More at [her website](#).
